## Summary

As a fresher Full Stack Developer, I have a foundational understanding of both front-end and back-end technologies, including HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Express.js, and MongoDB. I am eager to apply my skills in managing projects from concept to deployment, with a focus on delivering high-quality, user-focused solutions.

## Education

### Bachelor of Technology

Rajkiya Engineering College  
Kannauj  
Jul, 2021 - Jun, 2025

### Intermediate Examination

DAV Public School TTPP Asopur  
Ambedkar Nagar UP  
Jul, 2018 - Jun, 2019

## Technical Skills

HTML, CSS, Bootstrap,  
JavaScript, Node.js, Express.js,  
MongoDB, React.js

## Soft Skills

Problem-solving, Communication,  
Teamwork, Critical Thinking,  
Leadership

## Additional Skills

Public Speaking, Writing

## Languages

English, Hindi

## Certifications

- MERN Stack Development
- Master HTML to REACT.JS in 45 Days

## Work Experience

### CipherByte Technologies

Web Development Intern

Jun, 2024 - Jul, 2024

Completed a one-month internship in web development at CipherByte Technologies

- I gained hands-on experience with front-end technologies such as HTML, CSS, JavaScript, and React.js, as well as back-end development using Node.js, Express.js, and MongoDB. Contributed to various full-stack projects, developing and deploying web applications and enhancing my practical skills in creating and managing web solutions.

## Projects

### Weathervue

WeatherVue is a stylish weather app that delivers real-time updates and forecasts through a user-friendly interface. It provides accurate weather information, interactive maps, and detailed forecasts, making it easy to stay informed about weather

- Successfully integrated front-end technologies (HTML, CSS, JavaScript) with back-end services (Node.js) to create a seamless, fully functional weather application.
- Utilized Node.js to build a scalable back-end that efficiently handles multiple user requests and provides reliable performance.

### To-Do-List

ToDoList is an easy-to-use task management app that helps users organize and track their tasks with a simple interface for adding, and completing tasks.

- Integrated front-end (HTML, CSS, JavaScript) with back-end (Node.js) and database (MongoDB) to create a complete task management solution.
- Utilized MongoDB for efficient data storage and retrieval, ensuring persistent task management across sessions.
- Developed a scalable back-end with Node.js to handle multiple user requests and manage task data efficiently.

### Food-Website

Developed the front-end of a food website featuring a visually appealing and user-friendly interface.

- Created a responsive layout that ensures a seamless browsing experience across various devices and screen sizes.
- Designed a visually appealing interface with HTML and CSS, including custom styles and animations to improve the overall user experience.
